

Success Story of Project Completed for the Government

Date: April 2009

Project Owner:

Marine Department, Government Dockyard

Project Name (in English):

Government Fleet Information System (GFIS)

Project Name (in Chinese):

N/A

Project Description:

Supply services for the development, implementation, installation, training and maintenance of GFIS. The GFIS is to help Government Dockyard to manage its physical assets and maintenance functions more effectively. The system is a comprehensive solution with modular approach to let use the following components: Assets, Work Management, Materials Management, Purchasing Management, Project Management, Budget Management, Inspection Management, Scheduling, Analysis Reporting and Inquiry.

The interface between GFIS and the Treasury's GFMS has been built successfully on early 2009.

Means of Service Acquisition:

Open Tender (Tender Ref. PT/0310/2002); Contract Ref. C1067/2003

Contractor Name:

Unisys China/Hongkong Limited

Subcontractor Name:

Armitage Technologies Limited

Project Commenced on:

October 2003

Project Completed on:

June 2005 (Armitage is now providing the on-going support and maintenance services with recurring major enhancement services)
