

Success Story of Project Completed for the Government

Project Owner: The then CITB

**Project Name (in English): Central Gateway for the Government
Electronic Trading Services**

Project Name (in Chinese):

Project Description: Build an advanced common message platform (known as the Central Gateway) to facilitate trade document exchange. Since 2004, it has gradually replaced the old system, called EDI Communication Gateway (EDICOMM). This advanced platform uses XML technology to exchange trade documents, including but not limited to documents such as import and export declarations, dutiable commodities permits, etc. The platform is supporting:

- **large number of documents exchanged with high performance requirement, e.g., five (5) declaration messages per second**
- **sophisticated security requirements in message communication, data encryption, partner authentication**
- **high system availability**
- **disaster recovery**
- **in-depth message log requirement**

Means of Service Acquisition: ITPSA

Contractor Name: Hewlett-Packard Hong Kong Limited

Subcontractor Name: Axway Limited (formerly Viewlocity)

Project Commenced on: Aug 2002

Project Completed on: Dec 2004
