

Success Story of Project Completed for the Government

29 September 2005

Project Owner : The then Health, Welfare and Food Bureau

Project Name (in English) : Installation and Implementation of Microsoft SMS Solution

Project Name (in Chinese) : 安裝及推行微軟 SMS 方案

Project Description :

Installation and Implementation of Microsoft SMS Solution

Means of Service Acquisition : SOA – Server Bulk

Contractor Name : Fujitsu Hong Kong Limited

Subcontractor Name : Not Applicable

Project Commenced on : 13 December 2004

Project Completed on : 18 February 2005

Microsoft System Management Server (SMS 2003) was implemented and integrated in the MS Windows 2003 Active Directory with the deployment managed by Fujitsu. The whole implementation was completed in 3 months.

Fujitsu conducted detailed study on the environment and proposed the design of the Systems Management Server based on the network topology, Windows AD domain model, client expectations and requirements, and the security requirements. After the design specification was confirmed with the then HWFB, a Test Lab was established by Fujitsu to perform all the functional tests of SMS. Customized reports were developed based on the user requirements.

After the implementation of the production site, Fujitsu conducted the training class for the IT department for the daily operation of the SMS server and the subsequence deployment of the advance SMS client in the new user workstations in the future.
