

## Success Story of Project Completed for the Government

29 September 2005

**Project Owner :** Inland Revenue Department

**Project Name (in English) :** Implementation of the Enhancement of the Government Cash Receipting System (GCRS) for the Inland Revenue Department (IRD)

**Project Name (in Chinese) :** 稅務局政府收款系統改善計劃

**Project Description :**

To enhance the GCRS to enable IRD to take over GCRS from the Treasury

**Means of Service Acquisition :** Single Tender

**Contractor Name :** Fujitsu Hong Kong Limited

**Subcontractor Name :** Not Applicable

**Project Commenced on :** 22 July 2003

**Project Completed on :** 6 April 2004

The project provided the hardware, software and services for the implementation of Government Cash Receipting System (GCRS) Back-end Solution, and the enhancement of cash receipting functions for the collection of payments from the public.

The system was built in Wintel .Net environment with 3 tiers architecture connecting to the Branch Controllers in the IRD collection centres and postal remittance office. The payment transactions are stored in the GCRS Front-end system and then forward to the Back-end system in on-line mode. The back-end system also provides administration and control functions for the entire system with the interfaces to other IRD systems.
