

Response (in red) from Asia Solution Corp. Ltd.:

- Move Privacy Impact Assessment (PIA) from Category 1 to Category 4 – agreed by AsiaSoln as this should be done after the project is implemented
- More service types to Category 4 e.g. incident response/forensic – AsiaSoln would like to suggest an ISO 90003 on Software Engineering with risk assessment or even CMMI Appraisal be added to this category to ensure that there is a third party audit on the software development process
- OGCIO will encourage B/Ds to consider setting more payment milestones in their work assignment briefs – agreed by AsiaSoln and we suggest the government to pay the First Stage Payment once the Purchase Order is issued.
