

**Project Owner:** Hong Kong Police Force

**Project Name (in English):** Transport Management Information System II (TMIS2)

**Project Name (in Chinese):**

**Project Description:** The existing Transport Management Information System II (TMIS2) was implemented in 1999 to support Transport Division (TPTDIV) in managing the police vehicle fleet. This encompasses vehicle procurement, maintenance and the allocation of vehicles throughout the Force. The system also supports Police Transport Division (TPTDIV) and Police Driving and Traffic Training Centre (PD&TTC) to maintain all types of information related to police drivers and handle follow-up actions arising from traffic accidents involving police vehicles. The purpose of this project is to replace and enhance the existing Transport Management Information System II (TMIS2) which is running on the de-supported software of Sybase and PowerBuilder.

**Means of Service Acquisition:** Quality Professional Services 3

**Contractor Name:** FlexSystem Limited

**Subcontractor Name:** N/A

**Project Commenced on:** 1 December 2015

**Project Completed on:** 31 March 2017
