Huawei Services (Hong Kong) Co., Limited

I.   Service Category (C) Cloud IT Services

Table 1: Cloud IT Services Items

Item Number	Item Description	Manufacturer
C00001	**ECS**: An Elastic Cloud Server (ECS) is a virtual server that runs in a secure and isolated environment. It provides scalable computing capabilities that consists of vCPUs, memory, OS, and Elastic Volume Service (EVS) disks.	Huawei Cloud
C00002	**EVS**: Elastic Volume Service (EVS) provides persistent block storage for services such as Elastic Cloud Server (ECS) and Bare Metal Server (BMS). With advanced data redundancy and cache acceleration capabilities, EVS offers high availability and durability with an extremely low latency.	Huawei Cloud
C00003	**OBS**: Object Storage Service (OBS) is a cloud storage service optimized for storing massive amounts of data. It provides unlimited, secure, and highly reliable storage capabilities at a relatively low cost.	Huawei Cloud
C00004	**SFS**: Scalable File Service (SFS) is a network attached storage (NAS) service that provides scalable high-performance file storage.	Huawei Cloud
C00005	**RDS**: Relational Database Service (RDS) is acost-efficient web service for deploying, managing, and scaling relational databases in the cloud. RDS also provides performance monitoring and backup and restoration. RDS supports the following DB engines: MySQL, PostgreSQL, Microsoft SQL Server.	Huawei Cloud
C00006	**ELB**: Elastic Load Balance (ELB) provides load balancers to distribute traffic among multiple backend servers and balance application load. ELB increases the service capabilities and fault tolerance of your applications.	Huawei Cloud
C00007	**CBR**: Cloud Backup and Recovery (CBR) enables you to back up Elastic Cloud Servers (ECSs), Bare Metal Servers (BMSs), Elastic Volume Service (EVS) disks, SFS Turbo file systems, and on-premises VMware virtual environments with ease. In case of a virus attack, accidental deletion, or software or hardware fault, you can restore data to any point in the past when the data was backed up.	Huawei Cloud

II.   Government Public Cloud Related Services

Table 2.1 : Staff Service

Item No.	Description of Services	Staff Category
1	PS-Cloud Migration Service	Cloud Consultant
2	Professional Services	Senior Consultant
3.	PS-Cloud Migration Service	Senior Cloud Expert

Table 2.2 : Installation and Maintenance Service

Item No.	Description of Services
1	Developer Support Plan
2	Business Support Plan
3	Enterprise Support Plan
4	Maintenance Service - Onsite

Table 2.3 : Internet Connection Service

Item No.	Description of Services
1	The Elastic IP (EIP) service provides static public IP addresses and scalable bandwidths that enable your cloud resources to communicate with the Internet. You can easily bind an EIP to an ECS, BMS, virtual IP address, NAT gateway, or ELB load balancer, enabling immediate Internet access.
