

First Submission Dated 27 September 2013

Dear the Digital 21 Consultation,

If you would like to win customers, you need to create customer-delight. Now, many business executive are placing great concern on cyber-security.

<http://www.net-security.org/secworld.php?id=15640>

So far, Hong Kong has not yet been establishing Safe-harbor which is a streamline process on data security between U.S. and Europe.

http://en.wikipedia.org/wiki/International_Safe_Harbor_Privacy_Principles

In fact, European Parliament has raised its requirement on data-protection to every country in business with European Countries.

<http://www.net-security.org/secworld.php?id=15085>

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2001:008:0001:0022:EN:PDF>

Attached is a suggestion to cybersecurity in coming few years.

Beside disclosure (see attached), remedy and amendment to anticipate the same mistake is also essential.

So far, HK CERT and Cyber-Security Center in HK Police are good starting point. Government should drive further development in Cybersecurity Center and Technological Crime Prevent Unit (in HK Police) so that citizens can get help.

Courses on cybersecurity with various depth should be added into all kinds of courses relating to computing. Besides raising sense, this can help to establish human resource.

Conclusively, cybersecurity is the major development to ensure the freedom in internet (note: Apple and Samsung are also developing in the direction with cybersecurity); each citizen in Hong Kong should be able to connect to a platform for their acknowledgement and resource seeking about cybersecurity and latest incidence.

Regards,

Horace

Second Submission Dated 7 October 2013

In addition to my previous suggestion, HK Government should think about to get technological firms to organize. A proper organization of a technological firm can help it from innovation to marketing. (Please see the attached)

Nowadays, we are always talking about sustainable development. To turn innovative business into a pillar business in Hong Kong, HK Government has to get firms in well organized in a way to incinerate the growth of innovation.

Regards,
Horace
