

Dear Sir,

I support to have tips for tech startups on digital identity and the Startup Ecosystem. I also support to have City-wide Wi-Fi, establishing innovative platforms, closer collaboration with Mainland and deploy more sensors for city management as HK needs technological advancement. But I opposed Broadband and Wi-Fi Access for schools to drive e-Learning, programming in every child education and paperless solution as facing computer for a long time can easily have short-sighted and eye-illness. Proper filters should be developed to prevent eye illness.

Yours sincerely,

Kam Kin Pong
